

WHITEPAPER

TROPICAL SYSTEMS

"The Tropical System makes \$BNB mining accessible for everyone."

- MR. CRYPTO

Our Team develops their own mobile phone application that will go live at the beginning of Q3 2022 according to the roadmap.

With Tropical's System, anyone with a mobile phone will be able to mine the cryptocurrency \$TRO and later exchange it for the official Binance Smart Chain currency \$BNB. This application is currently under development and is being constantly refined by the programmers.

"Mr. Crypto has decided to set the goal of releasing the mobile application ready for the launch of Q3 2022."

Of course, there will be a closed alpha version in advance, where individuals investors will be invited to test the application and talk directly with the developers about any improvements and bugs.

Q1 - 2022

APPLICATION UNDER DEVELOPMENT

Q2 - 2022

CLOSED ALPHA VERSION

Q3 - 2022

OPEN BETA VERSION

After the release of the mobile app, work will of course continue on the app - in addition, a browser application will be released in Q4 2022, which will function like the mobile phone application and also offer the possibility to mine \$TRO coins with the function to convert them later to \$BNB.

Basically, all \$TRO Coins are listed on BscScan where everyone has the ability/possibility to track every transaction being made.

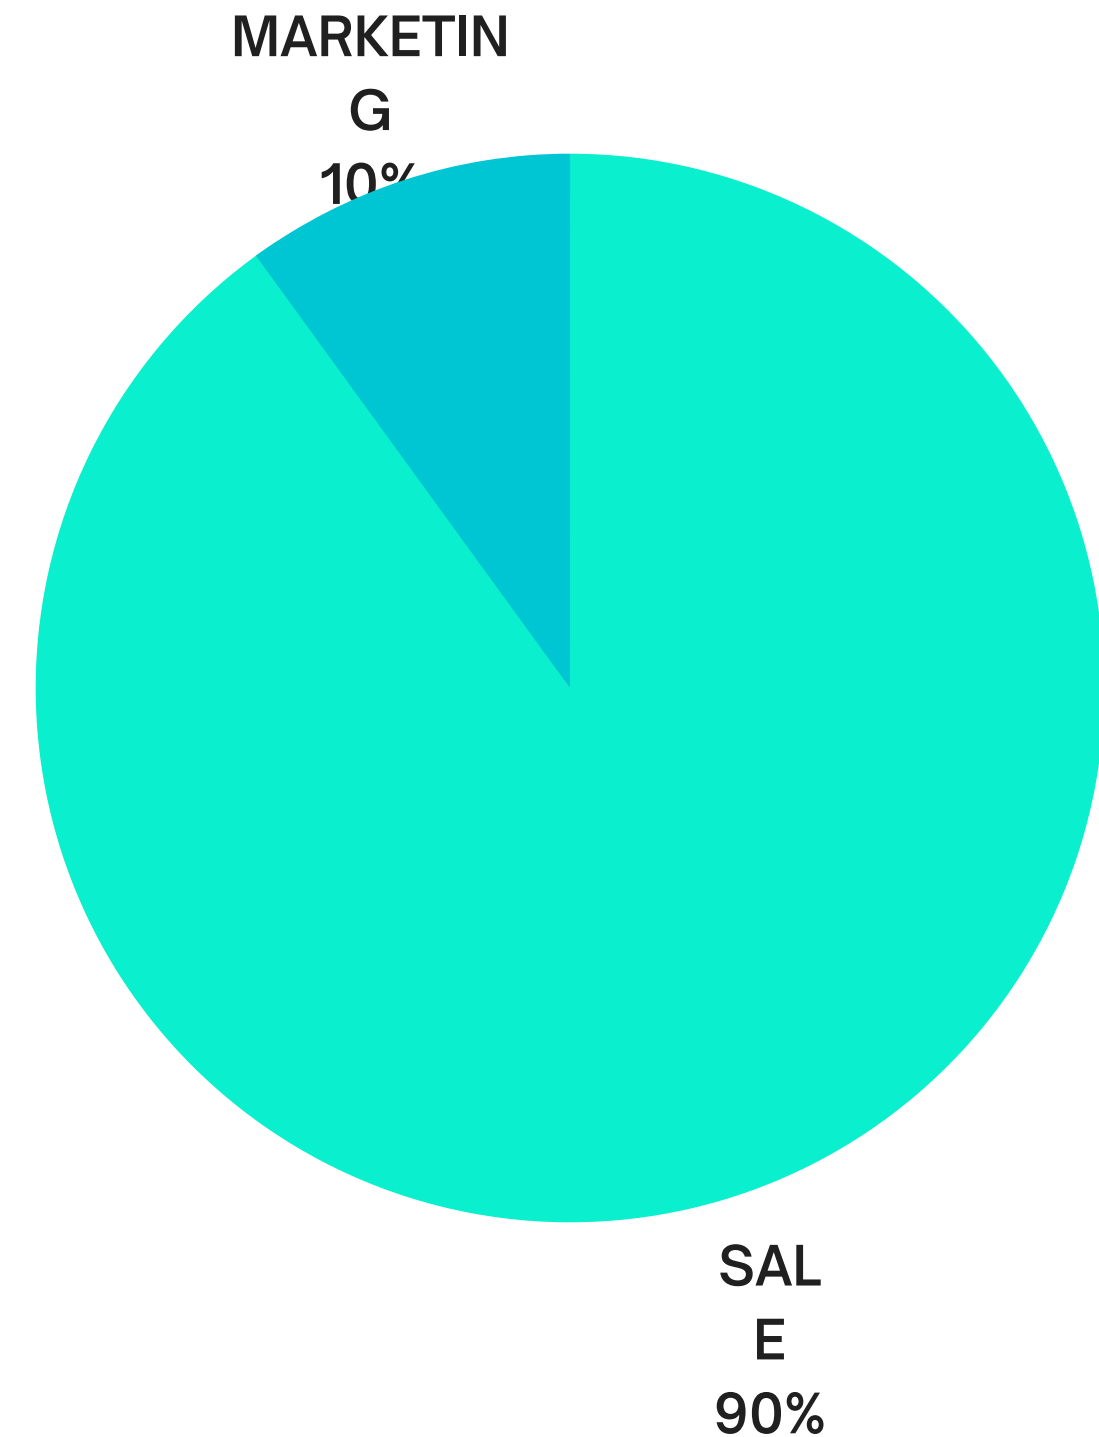

TOKENOMICS

1,000,000,000

\$TRO is the total supply

90% of the total stock of tokens are already available for sale.

Remaining 10% of the supply are used to promote the Tropical System.

FULL LOCKED LIQUIDITY POOL

THE TOKEN RATINGS FOR EVERY TRANSACTION:

3% BURN

2% MARKETING

3% BACK TO ALL HOLDERS

2% DEFI 3.0
